Professional Summary

second year B.Tech student in Artificial Intelligence and Data Science with proven experience across ML engineering, agentic AI, and full-stack development. Built and shipped systems spanning geospatial flood prediction, VR-based adaptive therapy, and multi-tenant healthcare SaaS. Led teams to 7 hackathon wins, including Top 10 at India Innovates 2026 among 26,000+ participants. Seeking a Summer 2026 internship in AI/ML Engineering or Full-Stack Development.

Education

Arya College of Engineering and IT, Jaipur

Bachelor of Technology in Artificial Intelligence and Data Science

Aug 2024 – May 2028

CGPA: 9.2/10

Technical Skills

Languages: Python, C, C++, Java, JavaScript, SQL

Machine Learning & AI: Scikit-learn, Pandas, NumPy, Computer Vision, TensorFlow

Agentic AI: LLM-based Agents, Prompt Engineering, Autonomous Workflows, Multi-Agent Systems

Web Development: React.js, Node.js, Express.js, REST APIs

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Linux, Jupyter Notebook

Projects

Jal Drishti: Urban Flood Prediction Engine | Python, Geospatial Analysis, React.js

GitHub — Live Demo

- Winner of **multiple hackathons**; selected for **India Innovates 2026** at **Bharat Mandapam**, one of India's largest civic-tech hackathons with **26,000+ participants**
- Developed a scalable **data pipeline** integrating **satellite imagery, GIS data, and meteorological datasets**, leveraging spatial interpolation and geospatial analytics for real-time flood risk assessment

Neuronest: Adaptive Virtual Reality Therapy System | Python, TensorFlow, Unity

GitHub — Live Demo

- Winner of **HACKSTORM '25 (250+ teams)** and **IDEA-THON '25 (160+ teams)** for developing a **VR-based exposure therapy platform** targeting PTSD, phobias, and anxiety disorders
- Developed an adaptive **biofeedback-driven system** leveraging **GSR and HRV signals** to personalize therapy; validated with mental health professionals and exploring pilot deployment

MediNexus: Hospital Management Platform | MERN Stack, Supabase

GitHub — Live Demo

- Built a **multi-tenant healthcare SaaS** for patients, doctors, and admins with **appointment scheduling, EHR management, billing, inventory tracking**, and secure **Supabase Auth-based role-based access control** with granular permissions
- Engineered **Health Passport (unified records)**, **referral system**, and **cross-hospital access control**; designed **concurrent booking** with slot locking and race condition prevention for reliable multi-user scheduling

Competitive Achievements

Winner, HACKSTORM '25 (250+ teams) Built an AI-powered VR therapy platform for mental healthcare

Winner, Geospatial Intelligence Hack '26 (180+ teams) Built an ML based urban flood prediction system

Winner, IDEA-THON '25 (160+ teams) Built a VR exposure therapy platform for personalized PTSD and phobia treatment

Consistent Podium Finisher Across Major Hackathons Secured **2nd Place at HackJKLU 5.0, JKLU (250+ teams)**, **2nd Place at Genisys 1.0, MNIT Jaipur (150+ teams)**, and **3rd Place at AceHack (200+ teams)**, demonstrating strong execution in high-pressure competitive environments

Top 10 Finalist, India Innovates '26 (26,000+ participants, Bharat Mandapam, New Delhi) – Presented a civic-tech solution to government officials, venture capitalists, and international delegates

Leadership and Community

Technical Workshop Facilitator Conducted 3 workshops on Git workflows and REST API design for 100+ aspiring developers

Open Source Contributor Submitted bug fixes and documentation improvements to scikit learn and pandas repositories

Hackathon Team Lead Led teams across idea validation, rapid prototyping, and final pitching in multiple winning hackathons

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
